

FIRST LEGO® League Policy for MINDSTORMS® RCX

FIRST LEGO League (FLL) has a long-standing policy to allow teams to use past releases of LEGO products alongside current materials as defined in the allowable parts rule. In keeping with this policy, the MINDSTORMS RCX will continue to be allowed. Teams can use either the MINDSTORMS RCX, or the newer MINDSTORMS® NXT product. Teams are competitive in FLL with either platform.

Both *FIRST* and LEGO respect the investments that teams and schools have made in the MINDSTORMS RCX. For this reason, LEGO Education made the commitment in 2006 to continue support of the MINDSTORMS RCX hardware and software into late 2009.

Please note: Teams using the MINDSTORMS RCX should understand that it may be increasingly difficult to find replacement parts and support for the platform and should plan accordingly.
